

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

FRANKLIN BOWDITCH DEXTER

NEW HAVEN

"Christ also loved the church, and gave himself for it; that he might sanctify and cleanse it with the washing of water by the word, that he might present it to himself a glorious church, not having spot, or wrinkle, or any such thing; but that it should be holy and without blemish."

Eph. v, 25-27.

**"One family we dwell in him,
One church, above, beneath,
Though now divided by the stream—
The narrow stream—of death."**

Public worship was set up in New Haven in 1638, and the First Church of Christ was organized in 1639.

The earliest extant record of admissions begins in 1685. Dismissions are first recorded in 1812, though for many years after that date with much irregularity.

From the record of baptisms, the town records, and other sources, a partial list of members before 1685 has been made, though necessarily incomplete; in this list names are assigned, conjecturally, to the dates of the earliest known intimations of membership.

The prefix *c* indicates that a person was received by *certificate* from another church; in cases of the admission of a husband and wife at the same date, details are given in full under the husband's name only.

Italics indicate a woman's family name before marriage, her husband's Christian name following in parenthesis; *w.* before the husband's name signifies *widow*.

The names of ordained ministers are in CAPITALS.
